Mines and Mining Stocks

Drain Tunnel Is Tapped and Avenue Is Found to Be Clear of Debris.

FINAL OPENING AT HAND

LAST OBSTRUCTION PROBABLY AT NO. 2 SHAFT.

At a point less than 500 feet from the No. 2 shaft of the Ontario mine, at Park City, the main drain tunnel has Albion again been tapped with a diamond drill Alice hole that has been sent through from Bullion-Beck the side drift that was started to en- Carisa compass the last obstruction encounstates that while the withdrawal of the drills was followed by a good flow Eagle & Blue Bell of water, there was no particular pressure behind it. After breaking through it was possible to push the drill rods over four feet farther by hand, the fact indicating that the main tunnel Mammoth May Day over four feet farther by hand, the fact indicating that the main tunnel is not congested with debris at that point. The drilling was done by N. H. Nevada Fairview. Wright of the Diamond Drilling company, whose offices are in the Dooly Lead King block, this city, and Mr. Bamberger is highly pleased with the manner in which he did the work.

Silver King Sacramento Silver Shield Star Con

which he did the work.

"I am now satisfied," said Manager
Bamberger, "that whatever obstruction
there may be ahead will not amount to
much. We have now commenced to
clean out that portion of the main tunnel around which the last side drift
was started, and it will probably not rewas started, and it will probably not require long to do it. As the main tunnel is evidently clear where the diamond drill hole went through, it may be that a like condition will be found Black Jack ... clear through to No. 2 shaft, where the cyclone entrance to the tunnel may be found Colorado

entrance to the tunnel may be found choked with material that must have accumulated in the station."

So far as Manager Bamberger has been able to learn, there is no bad ground in the 500 feet or less that spans the distance from the learn that spans the learn that spans the learn that the the distance from the last cave to the New York avenue became clogged up nearly two Yankee Yellow Rose

Mr. Bamberger will leave for Delivers today to be in attendance at the annual meeting of the Daly-West compalsy Annex afternoon.

YERINGTON EAST ZONE IS RICH IN COPPER ALSO Stray Dog

"One thing of importance has been dem onstrated in the Yerington district by the Yerington Copper company." said Engineer L. A. Jeffs on his arrival from that camp yesterday morning, "and that is that identically the same conditions prevail on the east side of the valley as those on the west side, where the best developed properties are locatd. The developed properties are locatd. The same character of contacts exist and pre-cisely the same character of ore is being opened up in quantity. The Verington Copper company's property has now reached a stage of development where it is entitled to be classed as a mine. The tunnel workings are developing a great body of first-class copper ore and at a depth that leaves no doubt as to the

"The east side of the district has had to wait on the development of the west side or west zone, as that happened to be the first to attract attention and produce a mine. In my judgment the east zone is going to prove equally important with the other and now that the Yer-

with the other and now that the Yerington Copper company has started the
ball rolling, capital will jump at the
change to get in there."

Mr. Jeffs admitted that he might be
accused of partiality in mentioning the
east side in such terms because of his
having undertaken the purchase of eight
claims flanking the Yerington Copper
company's possessions. He declared,
however, that the "goods were there" claims flanking the Yerington Copper company's possessions. He declared, however, that the "goods were there" and, as there was no keep-out signs posted, anybody could verify what he had said. During his visit to the camp he succeeded in landing seven claims on the west zone, and the placing of each will occupy his attention during the next week or two. It is understood that he has been acting for aimself and a number of his Michigan friends and backers, and that means that a combination is going in that knows what copper mining is.

Before returning home Mr. Jeffs took a run into the Seven Troughs country, twenty-five miles north of Lovelock, where there is a great deal going on in the gold properties. Everybody in there, he says, is most enthusiastic over the outlook and predictions are made that the district will at least rival Goldfield.

Michigan friends and backers, and that means that a combination is going in that knows what copper mining is.

Before returning home Mr. Jeffs took a run into the Seven Troughs country, twenty-five miles north of Lovelock, where there is a great deal going on in the gold properties. Everybody in there, he says, is most enthusiastic over the outlook and predictions are made that the district will at least rival Goldfield.

PIONEER OF WONDER HOME FROM THE CAMP

Scott Groo, one of the first of the lucky bunch to get in and make important discoveries in the Wonder district, iest May, is in from camp for a few days' visit at home, and to participate in the rounding out of a company of local men to operate one of the groups of claims which he owns. Wonder is situated about eighteen miles northeast of the camp of Fairview, and the rich mineral zone. Mr. Groo says, has now been fully proved in a distance of six miles square. There are four or five systems of ledges running through the district and Goldfield talent is now going in strong. The ores are a silver sulphide, carrying high values in gold and the ledges that have been opened up are rapidly placing, the district in the from rank.

Mr. Groo owns five groups of claims in the camp and he says he could have sold every one of them at fancy prospect prices, but he preferred to hold and develop them to an extent, at least that would make them worth what he considered they were worth, from surface showings. The placing of one group finished up he will return to camp to take care of and continue developments on the other groups.

IS MOVING TO FRONT

Lively Weeks' Trading.

During the week on the mining exchange 389,653 shares of stock, with a selling value of \$281,279.32, changed hands, yesterday's proportion of the totals being 48,950 shares and \$32,895.75. Several stocks have been unusually active and strong, but the stock to attract particular attention during the last half of the week has been Star Consolidated. A week ago it was selling under 30c. Yesterday it touched 53c on the strength of the reported move to consolidated with the Black Jack. At the close it eased off and sold at 2c below the opening pace. May Day was another of the active ones and during the unloading of about 40,000 shares it sagged considerably. It closed strong at 29c. Tintic issues have all tared well and there has been a noticeable change for the better in the Park City list and some of the Nevadans.

Following is the daily market comment of Paine, Webber & Co., Boston, together with the range of prices of copper stocks and other Boston listings in which the west is incrested, as well as a similar report on. New York curb transactions, a feature that has just been a dded by James A. Pollock & Co. to its private wire service, and from which it is secured for use in this department of The Herald.

Boston, Feb. 16.—The market today was without feature and the week closed dull. Lawson brokers were busy selling Trinity and it looks as if the game was pretty nearly over. The rise in Amaigamated and Anaconda does not seem to suit the plans of the insiders and every chance is taken to depress the stock. The bank statement was more favorable than expected and will tend to cause a better market the first of the week.

(New edition issued Nov. 15th, 1906.)
Is a dozen books in one, covering the History, Geography, Geology, Chemistry, Mineralogy, Metallurgy, Terminology, Uses, Statistics and finances of Copper. It is a practical book, useful to all and necessary to most men engaged in any branch of the copper industry.

Its facts will pass muster with the trained scientist, and its language is easily understood by the everyday man.

It gives the plain facts in plain English without fear or favor.

It lists and describes 4626 Copper Mines and Companies in all parts of the world, descriptions running from two lines to sixteen pages, according to importance of the property.

The Copper Handbook is conceded to be the

WORLD'S STANDARD REFER-ENCE BOOK ON COPPER. The mining man needs the book for the

The mining man needs the book for the facts it gives him about mines, mining and the metal.

The investor needs the book for the facts it gives him about mining, mining investments and copper statistics. Hundreds of swindling companies are exposed in plain English.

Seven Troughs Therein Gold Mines Company.

C. W. Knudson, Brigham City, Utah President. Vice-President James Halvorsen, Cashier State Bank, Brigham City, Treasurer Secretary

Incorporated Under the Laws of Utah for One Million Shares; 300,000 Shares in the Treasury.

This company owns the THEREIN GROUP of claims in the midst of Seven Troughs Mining District, Nevada. These were the first locations in the district, being the claims upon which W. A. Stauts, the pionéer prospector there, grubstaked by Joe Therein and A. Borland, found the first gold in the camp. The group consists of five contiguous claims. Upon and appurtenant to them are the waters of Seven Troughs Springs, all rights to the appropriation of which are owned by this company, for milling purposes,

The group is adjoined on the east by the Kindergarten Mine from which the first shipment of ore is being made from the district. This ore is being taken from within 35 feet of and is being worked right up to the east side line of the Therein Group, within a four to five foot ledge, upon which leasers on the Therein group are now sinking in ore. Open cuts have exposed at the surface other rich veins in this group, upon which leasers have commenced to work. It is the ground which leasers choose.

25,000 shares of the Treasury Stock of this company has been set aside by the Company

FOR SALE AT 50c SHARE

which offers to the public the SAFEST and BEST INVESTMENT IN SEVEN TROUGHS—the coming Goldfield of northern Nevada. Subscriptions for this stock will be received at the company office, 401 Scott Building, Salt Lake City, on application to
